Doug and Bob:

Shelly has asked me to reach out to the West Vermont PRPs and invite you, your clients, consultants and colleagues to come to Chicago again in a few weeks. Weston has developed a new three dimensional model for groundwater at the Site. EPA would like to show you this, and give you all an opportunity to ask questions about the model, as well as the conclusions we have reached regarding the Site which will be presented in a Technical Memorandum Weston is preparing. I have just sent an email to Scoot Reisch, extending the same invitation to Aimco.

Shelly is targeting the week of May 26th, or the following week, June 2, for a meeting in Chicago. You can let us know if you have preferred dates for such a meeting in Chicago in either of those two weeks at the end of May and the beginning of June. The weather here should be excellent at that time.

Hope that all is well with you and yours,

Thanks, Tom

Tom, this message follows our discussion yesterday regarding the meeting that AIMCO has requested of EPA and that now has been scheduled for November 12. To date, we have not received from AIMCO any substantive response to our communications on behalf of Genuine Parts Company that the parties explore a reasonable and consensual basis for jointly providing the West Vermont Street Site residential area with an alternative water supply. As you know, we had previously indicated an interest in attending a meeting with AIMCO and EPA for that purpose.

Unfortunately, I understand that AIMCO has indicated to EPA a contrary purpose for the November 12 meeting; to deny that AIMCO has any responsibility for the contaminants identified in the residential area. Such denial flies in the face of the facts, as recently demonstrated in Weston's January 31, 2013, Technical Memorandum, Analytical and Hydrogeological Evaluation. We have repeatedly made our position clear, that prior releases and AIMCO's voluntary remediation activities at the former Accent Cleaners facility at Michigan Plaza are the most significant, and perhaps only, source of the contaminants identified in the residential area.

At this point, we see no compelling reason to attend the November 12 meeting since AIMCO's apparent intention is to merely rehash its erroneous denial of responsibility. On behalf of Genuine Parts Company, we remain interested in attending any meeting with AIMCO and EPA that would be for the purpose of exploring a reasonable and consensual basis for jointly performing the work.
